Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of the below numbered claims in the application.

Listing of Claims:

1. (Original) A method for producing a compound represented by formula (I):

$$R_1$$
 R_2
 R_2
 R_3
 R_3
 R_3
 R_4
 R_5
 R_5
 R_5
 R_6
 R_7
 R_8

(wherein A represents -(CH₂)n-, where n represents an integer of 0 to 10;

B represents -CH₂-, -(C=O)-, -CH(OH)-, -CH(NH₂)- or -C(=NOR)-, where R represents a hydrogen atom, a linear or branched alkyl group having 1 to 8 carbon atoms (which may be substituted with an amino group that may be mono- or di-substituted with a linear or branched alkyl group having 1 to 4 carbon atoms);

D represents -(CH₂)_m-R', where m represents an integer of 0 to 10, and R' represents a hydrogen atom, a linear or branched alkyl group, a linear or branched alkynyl group, a linear or branched alkenyl group, a cycloalkyl group, a cycloalkenyl group, a heterocyclyl group which may be substituted, an aryl group which may be substituted, a heteroaryl group which may be substituted, an -OX group (where X represents a hydrogen atom, a linear or branched alkyl group, a linear or branched alkynyl group, a linear or branched alkenyl group, a cycloalkyl group or an aryl group which may be substituted) or a halogen atom;

E represents a hydrogen atom or a linear or branched alkyl group;

G represents -(CH₂)_p-J, where p represents an integer of 0 to 4, and J represents a hydrogen atom, an OH group, a SH group, a methylthio group, a carboxyl group, a carbamoyl group, an amino group, a guanidino group, a linear or branched alkyl group, a cycloalkyl group, a linear or branched alkynyl group, a linear or branched alkenyl group, an aryl group which may be substituted, a heterocyclyl group which may be substituted, or a heteroaryl group which may be substituted;

bond Q represents a single bond or a double bond; and

R₁, R₂ and R₃ may be the same or different, and each represent a hydroxyl group, an amino group (which may be mono- or di-substituted with a linear or branched alkyl group having 1 to 4 carbon atoms), -OL, a linear or branched alkyl group, a linear or branched alkenyl group or a linear or branched alkynyl group, where L represents a linear or branched alkyl group, a linear or branched alkyl group or a linear or branched alkynyl group), a prodrug thereof or a pharmaceutically acceptable salt thereof;

comprising reacting a compound as the starting compound represented by the following formula:

(wherein A, D and bond Q have the same meanings as defined above, and X and Y may be the same or different and each represent a linear or branched alkyl group or a protecting group of a carboxyl group) with an α -amino acid ester represented by the following formula:

(wherein E and G have the same meanings as defined above, and Z represents of a linear or branched alkyl group or a protecting group of a carboxyl group) in the presence of a base and a coupling agent, to yield a compound represented by the following formula:

(wherein A, D, E, G, bond Q, X, Y and Z have the same meanings as defined above), and then subjecting this compound to hydrolysis, reduction, amination or amidation, hydroxyimination and/or ester conversion, if desired, to obtain the desired compound of the formula (I).

2. (Currently Amended) A method for producing a compound which is for the production of a compound of formula (I) as defined in Claim 1, a prodrug thereof or a pharmaceutically acceptable salt thereof, represented by the following formula:

(wherein D and n have the same meanings as defined in claim 1, M_1 and M_2 may be the same or different and each represent an oxygen atom or a sulfur atom, and P and P' may be the same or different and each represent a hydroxyl protecting group);

comprising reacting a compound represented by the following formula:

(wherein P and P' have the same meanings as defined above) with a compound represented by the following formula:

(wherein D, n, M₁ and M₂ have the same meanings as defined above).

3. (Original) A compound represented by formula (I):

$$R_1$$
 R_2
 R_2
 R_3
 R_3
 R_3
 R_3
 R_4
 R_5
 R_5
 R_6

(wherein A, B, D, E, G, bond Q, R_1 , R_2 and R_3 have the same meanings as defined in claim 1), a prodrug thereof or a pharmaceutically acceptable salt thereof.

4. (Original) The compound of the formula (I) according to claim 3, a prodrug thereof or a pharmaceutically acceptable salt thereof, wherein in the case n represents 6, D represents a n-heptyl group and p represents 1, then J represents a group which is neither a phenyl group (the phenyl group is substituted with an -OW group at the p-position where W represents a hydrogen atom, a linear or branched alkyl group, or a linear or branched alkenyl group) nor a 3-indolyl group.

- 5. (Original) The compound of the formula (I) according to claim 3, a prodrug thereof or a pharmaceutically acceptable salt thereof, wherein in the case n represents 6, D represents a n-heptyl group and p represents 1, then J represents a group which is neither a phenyl group (the phenyl group is substituted with an -OW group at the p-position where W represents a hydrogen atom, a linear or branched alkyl group, a linear or branched alkenyl group or a linear or branched alkynyl group) nor a 3-indolyl group.
- 6. (Currently Amended) A compound which is for the production of a compound of formula (I) as defined in Claim 1, a prodrug thereof or a pharmaceutically acceptable salt thereof, represented by the following formula:

(wherein P and P' may be the same or different and each represent a hydroxyl protecting group).

7. (Original) A compound represented by the following formula:

(wherein A, D, X and Y have the same meanings as defined in claim 1).

- 8. (Previously Presented) A pharmaceutical composition containing a compound of the formula (I) according to claim 1, a prodrug thereof or a pharmaceutically acceptable salt thereof.
- 9. (Original) The pharmaceutical composition according to claim 8 for preventing or treating a viral infectious disease.

- 10. (Original) The pharmaceutical composition according to claim 9 wherein the viral infectious disease is an infectious disease by HCV.
- 11. (Original) The pharmaceutical composition according to claim 10, wherein the infectious disease by HCV is hepatitis C, cirrhosis, liver fibrosis or liver cancer.
